PROFESSIONAL SUMMARY

BI Developer and Data Analyst with **6 years of professional experience**, including **4 years specialised in analytics and business intelligence** across manufacturing and industrial environments. Expert-level in **Power BI** and **advanced Excel**, with **2 years of hands-on SQL** for querying, modelling and ETL. Delivered **15+ executive dashboards** used for strategic decisions and engineered pipelines that cut manual reporting time by over **60%**. Seeking a junior-to-mid analytics role in the US, Canada or Australia — **currently in Iran and able to relocate with employer visa sponsorship**.

PROFESSIONAL EXPERIENCE

BI Developer & Data Analyst

Pishgaman — Industrial Manufacturing

2023 – Present

- Architected **10+ executive Power BI dashboards** covering production, sales and supply-chain KPIs — adopted as the primary decision-support tool by the CEO and senior leadership.
- Engineered ETL pipelines in **SSIS and SQL Server** consolidating 5+ enterprise sources, cutting manual data preparation by **~60%** and eliminating reporting errors.
- Designed star-schema data models with advanced **DAX** measures for time-intelligence, variance analysis and rolling forecasts, enabling self-service analytics for non-technical managers.
- Automated report scheduling and refresh workflows so daily KPI dashboards were live by 8 AM with no manual intervention.
- Built **Python/Pandas** cleaning scripts that standardised inconsistent departmental inputs and measurably improved data quality.

Data Analyst & BI Specialist

Roka Ceram — Ceramics Manufacturing

2021 – 2023

- Built production-planning analytics and daily, monthly and annual statistical reports for senior management, giving visibility into output efficiency, defect rates and capacity utilisation.
- Standardised **ISO 9001-aligned** process documentation and audit procedures; achieved zero non-conformance findings across 2 external audits.
- Led implementation of an **RFID smart-warehouse tracking system**, removing manual stock counts and reducing inventory cycle time by an estimated 30%.
- Drove a facility-wide 5S programme, improving operational efficiency and safety compliance.

Data Planner

Mehrdad Ceram · Kasra Sanitary Ware

2020 – 2021

- Produced 3-month and 6-month performance control reports with actionable trend analysis for operational planning.
- Ran SWOT analyses and revised employee authority frameworks in line with organisational strategy; used **MS Project (MSP)** for scheduling and progress tracking.
- Diagnosed sales workflow inefficiencies and improved office automation systems, increasing operational visibility.
